PROFESSIONAL SUMMARY

GenAI Engineer with **2+ years** of production experience building agentic AI systems at Comcast (via Accenture), serving 4,000+ users. Expert in multi-agent orchestration (LangGraph, LangChain), RAG pipelines, and scalable LLM systems. Delivered AI automation cutting 70–80% manual engineering effort. Claude Certified Architect (Anthropic) · AWS Certified · Experienced in AI product development and LLM evaluation · Top 1.7% in JEE 2020 out of 1.2M candidates.

TECHNICAL SKILLS

Languages: Python, C++, SQL

LLM & GenAI: LangChain, LangGraph, Azure OpenAI (GPT-4o), Anthropic Claude, Prompt Engineering, RAG, Multi-Agent Orchestration, Tool/Function Calling, Vector Search, Hugging Face, LLM Evaluation

Backend & APIs: FastAPI, REST APIs, Async Processing, Streaming APIs, Pydantic, Azure Service Bus

Cloud, DBs & DevOps: Microsoft Azure, Docker, GitHub Actions, CI/CD Pipelines, PostgreSQL, MongoDB, Git

Certifications: Claude Certified Architect (Anthropic) - [link](#) · AWS Certified ML Engineering Associate - [link](#) ·

Gemini Certified Agent Development - [link](#) · Accenture – Reinvention with Agentic AI - [link](#)

WORK EXPERIENCE

Accenture | AI/ML Computational Science Engineer Analyst

Jun 2024 – Present

Genlite-Genie — Enterprise GenAI Platform | Comcast · 4,000+ Users

Automated Defect Analysis System (ADAS):

- Accelerated defect resolution by **70%** across **4 teams** by architecting a production multi-agent LangGraph orchestration framework with **4 specialized agents** (GitHub, Jira, AST, Fix Generator).
- Automated the full triage → root-cause → PR generation workflow, eliminating manual triage for **~400 engineers**.
- Cut PR generation latency by **40%** via ThreadPoolExecutor-based concurrent **AST** analysis and GPT-4o-powered code generation and fix synthesis.

Virtual Scrum Master — Sprint Analytics & Reporting Agent:

- Eliminated **3–4 hrs** of manual reporting per sprint for **5 Scrum teams** (~500 users) by building an agentic LangGraph + FastAPI pipeline with cron-triggered email collection and reply aggregation.
- Auto-generated executive PowerPoint decks containing sprint health scores, velocity trends, and blocker analysis, slashing reporting overhead by **80% per sprint cycle**.
- Delivered automated sprint intelligence, saving ~500 users from repetitive reporting each sprint.

Async Queue Architecture — Figma-to-Code Pipeline:

- Restored **100% uptime** for a production AI code-generation pipeline serving **3,000+ users** by resolving a critical Azure Service Bus bottleneck.
- Decoupled a monolithic queue into independent async image and JSON consumer services.
- Eliminated throughput failures under high concurrent load, improving overall pipeline throughput by **3×**.

IvLabs – VNIT, Nagpur / Research Intern → Research Member

Jun 2022 – Oct 2023 - [Github](#)

- Developed an autonomous obstacle avoidance pipeline for the **Sahayak** medical robot using **ROS**, **A***, **RRT**, and **B-spline** trajectory optimization, achieving **~10–15%** shorter and smoother planned trajectories.
- Built and evaluated 20+ custom ROS simulation environments, executing 15+ navigation experiments with static and moving obstacles to assess obstacle avoidance performance.
- Optimized **SLAM** loop closure by benchmarking **4** place recognition models.

PROJECTS

Enterprise AI Inventory Management System | LangGraph, SQL, Python *Personal Project* - [Github](#)

- Built an AI-powered Inventory Management System using **FastAPI**, **Python**, **PostgreSQL**, **SQLAlchemy**, and **REST APIs**, following **Repository-Service architecture** and Dependency Injection.
- Integrated Groq LLMs** to enable natural language inventory queries, contextual question answering, and AI-generated inventory summaries using prompt engineering and LLM orchestration.
- Implemented Agentic AI workflows** with **intent classification**, **Tool/Function calling**, **structured outputs**, and an extensible architecture for **RAG**, **LangChain**, **LangGraph**, and **AI agents**.

EDUCATION

National Institute of Technology, Nagpur

Dec 2020 – May 2024

B.Tech | CGPA: **8.14 / 10**

- Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Database Management Systems, OS

ACHIEVEMENTS

- Accenture Impact Award** — Awarded for engineering the ADAS multi-agent system that reduced bug resolution time by **70%** across 4 engineering teams.
- Ranked in the **top 1.7% of 1.2M candidates** in **JEE (Main) 2020**.
